

7-Day Node.js Learning Plan

Day 1: Introduction to Node.js + Setup

- What is Node.js?
- Install Node.js from nodejs.org
- Run 'node -v' to check version
- Create hello.js and run with 'node hello.js'

Day 2: Node.js Core Modules

- Learn fs, path, os modules
- Use fs.writeFileSync and fs.readFileSync
- Display system info using os module

Day 3: NPM & External Modules

- Run 'npm init -y'
- Install chalk using 'npm install chalk'
- Use it with require and print colorful messages

Day 4: Creating a Web Server using HTTP Module

- Use http.createServer to serve a message
- Write response headers and end response
- Run on localhost:3000

Day 5: Express.js - Framework for Node

- Install Express with 'npm install express'
- Create GET routes: '/', '/about'
- Use app.listen to run server

Day 6: REST API + CRUD Operations

- Use express.json() middleware
- Create GET, POST, PUT, DELETE routes

7-Day Node.js Learning Plan

- Test using Postman or Thunder Client

Day 7: MongoDB + Mongoose Integration

- Create MongoDB Atlas account
- Install mongoose
- Connect DB and create User model
- Add API routes to save and fetch users
